

AD-50eC Metal & Spark Diverter System

Protect Your Production Lines from Fire & Damage from Loose Metal

New Features

- Simplified installation in new or existing lines.
- Patented ARGUS Static Control infrared spark detectors.
- Improved protection against interference & vibration.
- Self monitoring indicator lights - low air pressure, low water level.
- Self monitoring indicator light showing when ejection bin is full.
- User friendly digital programmable control panel.

Standard Features

- Automatic fire and metal protection for production lines.
- Available as metal, spark or metal & spark diverter.
- 24 volt operation, requires 5.5 BAR plant air pressure.
- Compact - requires only 3.4 meters for installation.
- 50 millisecond reaction time, means less waste.
- Water spray extinguisher system easy & inexpensive to refill.
- Operates in both positive and negative pressure.
- Spark is diverted, extinguished, machines stopped & alarm sounded.
- Metal is diverted into a collection can and production is not interrupted.

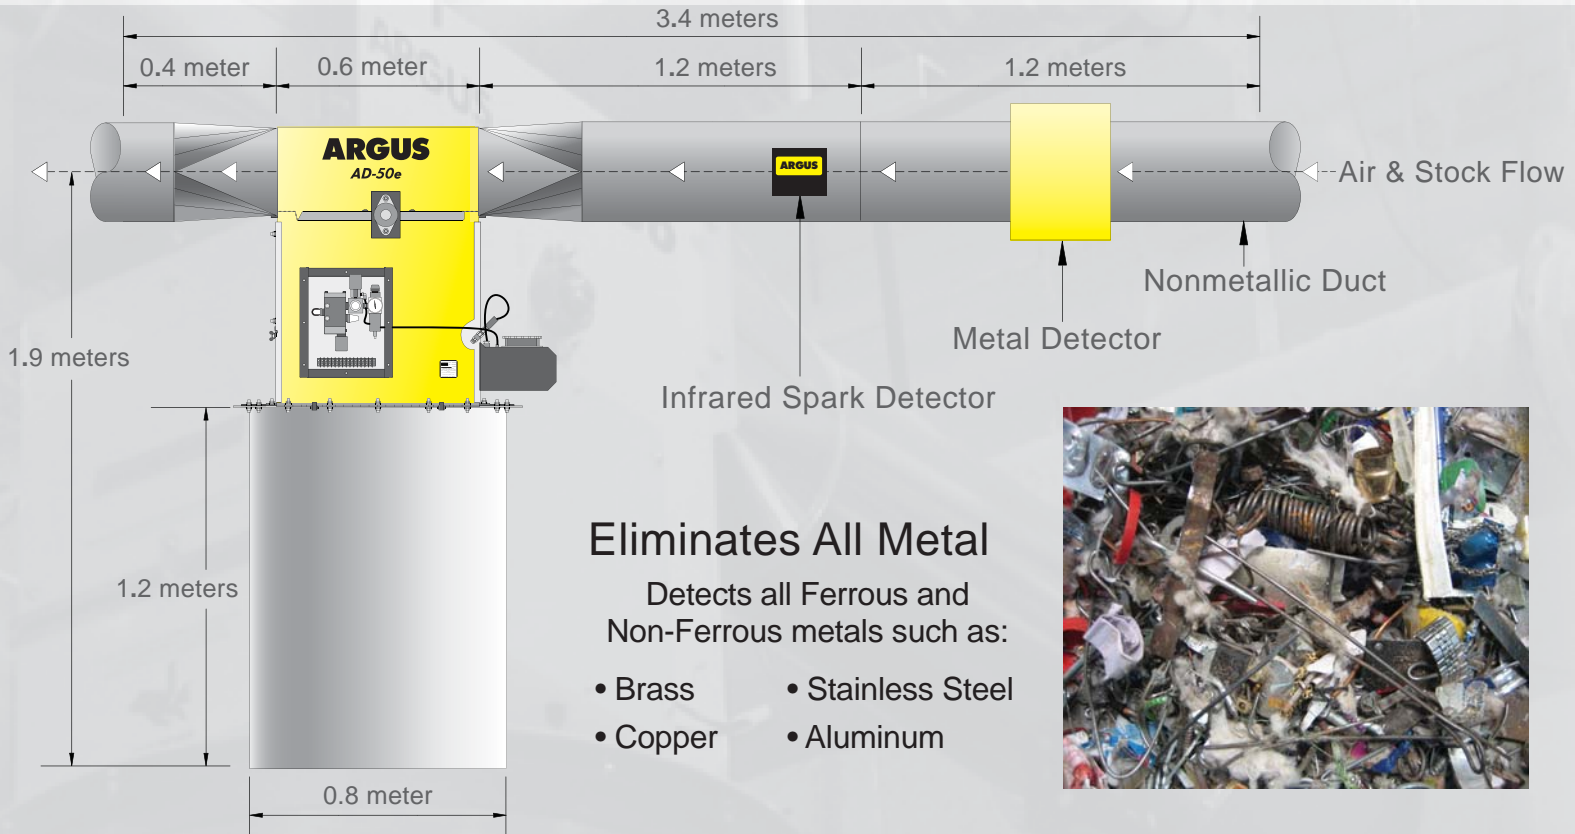

ARGUS

AD-50eC Metal & Spark Diverter System

Dimensions

Eliminates All Metal

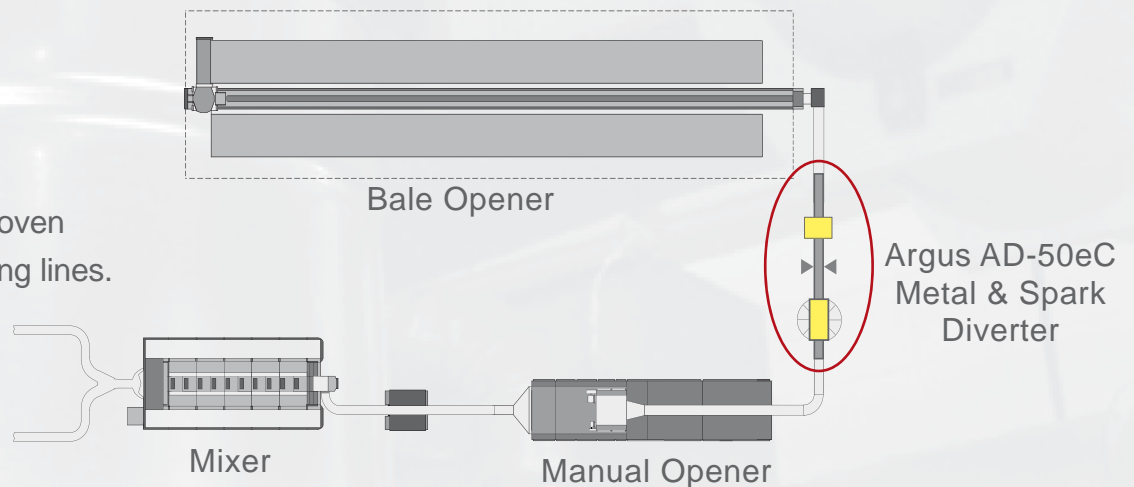

Detects all Ferrous and Non-Ferrous metals such as:

- Brass
- Stainless Steel
- Copper
- Aluminum

Example Location of AD-50eC

Also used to protect Non-Woven card lines and waste recycling lines.
